PROJECTS

Npm Package | JavaScript 2025

Aug 2024 – Feb

- Developed an Npm package for handling the api calls that we make using fetch function from JavaScript.
- Benefits of using: Reduces the lines of code that we need to write while using fetch function from JavaScript.
- Flow: install dependency async-apicall from npm, then call fetchapi() function along with url and it will return the data

oAuth Server along With Google Login| Spring boot, oAuth ,Google Console, 2025

March 2025 – April

- Ensured end to end login using form login or google login.
- Implemented security filter chains for handling login queries.
- Implemented secured routes user can access Apis after successful login.

Community Engagement Platform | React.js, Web Apis, Tailwind CSS, Context Api 2024

Jan 2024 – Feb

- Utilized Web Apis, along with YouTube Api for rendering blogs and videos form of content.
- Integrated chatbot in JavaScript and React where user can do basic chats.
- Provided various forms of content like user can surf videos, read vlogs watch memes and can watch facts.
